

**LAWRENCE HOUSE SUPPORTED ACCOMMODATION**

**Procedure for safe access to LH in the event of snow / ice**

In the event of snow and/or ice, the Project Worker on duty should ensure that a pathway to the front door of Lawrence House is kept clear of snow and ice by the use of sand or grit or salt, to maintain safe access to the property.

Should snow have fallen overnight, the Project Worker on duty should ensure that a pathway is cleared as soon as possible.

When snow falls during the day, then this work should be undertaken as soon as possible after it has stopped snowing.

In icy weather, the Project Worker on duty should always check to see if the pathway needs maintaining by adding further sand / grit / salt.

This decision is at the discretion of the Project Manager. The Project Manager and Project Workers should always ensure that a supply of sand / grit / salt is maintained at Lawrence House for this specific purpose. This should be stored tidily in the laundry room.
